Standard Guy Wire	3/8"
Soft Locks	3/8"
Soft Steel Bolts	3/8"

### Features

- Forged Jaws for Long Life
- Brush Protection Standard on All Jaws
- New Pull-Pin Design for Quick Jaw Change
- Bright White, LED Lights for Working in Low Light Conditions
- Three Compression Heads-ND, O, and BG
- One Hand Operation
- One Cutting Jaw For ACSR, Guy Wire & Bolts
- Rotational Head
- Audible Bypass when Predetermined Pressure is Achieved
- Tested Up To 75kV
- 5 Year Warranty on Tool, Battery & Charger

The **SL-ND** was developed after listening to feedback from our customers for a more robust, higher-quality, REC-style streamline tool. This new tool platform is the culmination of almost three years of research and development and will stand up to the most demanding tasks that linemen face every day.

The SL has a choice of five jaw types, including three compression heads, the SLND-JAW, SLO-JAW, or SLBG-JAW. The SLND-JAW head combines ND and K jaws. For cutting, switch to the SLCUT-JAW and for bending, use the SLCB-JAW. Quickly change between head types with the pull-pin design.

No need for another battery system, as this tool operates on the same 14.4 volt battery used in all of the Huskie Robo tools. The SL-ND Streamline tool not only carries a 5 year warranty on the tool but on the battery and charger as well.

The **SL-630** is a battery operated, dieless compression tool used to compress Anderson style lugs. 6.2 tons of compression force is achieved when the tool advances and bypasses at the predetermined pressure. Advance and retract buttons on the tool handle allow for one hand operation, freeing the other hand to maneuver the cable.

**NOTE:** Both the SL-630 and SL-750 are designed to crimp Anderson Style connectors. Other brand connectors manufactured to ANSI specifications C119.4 can be used. For range-taking connectors, the cable must be maximum size specified for the connector. Consult your connector manufacturer for dieless applications.

For additional ordering information, please refer to page 10.

- 5 Year Warranty on Tool, Battery & Charger

The **SL-750** is a flip-top, dieless tool used to crimp cables up to 750 MCM. The flip top latch opens to allow for easy cable positioning and removal. The dieless system is used for non-tension splices and terminations. There is one stationary and three movable indenting nibs which close at 90° angles to each other so that the connector is squeezed equally at four strategic points with 6 tons of force. The top can be unlatched to accommodate larger size lugs and cables up to 750 MCM. Typical applications include in-line splicing connectors and lug terminations.

**NOTE:** Both tools are designed to crimp Anderson Style connectors. Other brand connectors manufactured to ANSI specifications C119.4 can be used. For range-taking connectors, the cable must be maximum size specified for the connector. Consult your connector manufacturer for dieless applications.

Huskie Tools is pleased to introduce the **SL-CB**, the first of its kind in the electrical utility industry, is a battery powered cable bender. The SL-CB utilized the pull-pin design, allowing technicians to change jaws from compression, to cutting, to cable bending. The SL-CB is just one of the many ergonomic solutions, provided by Huskie Tools, to help reduce strains and sprains associated with the daily tasks of a powerline technician. The SL-CB has several different settings, so the tool can be used on either secondary or primary conductor in a variety of sizes. Featuring a low profile, the SL-CB can be used in a variety of close-quarter environments; such as underground vaults, meter bases and substation applications and wherever cable bending is required.

**NOTE:** Contact cable manufacturer for specified cable bending radii and cable bending requirements.

# SL-S20 ROBO\*CUT™

6 Ton Streamline Cutting Tool with .75" Jaw Opening

LED lights on both  
sides of tool

The **SL-S20** was designed to cut the toughest steel used in construction today. It can replace an entire tool kit, including several sizes of conventional bolt cutters, hacksaws, acetylene torches and cable cutters.

With the pull of a trigger, you can cut ACSR cables up to 477, standard guy wires to 3/8", and ground rods to 1/2". The specially designed flip-top latch and rotating head provide exceptional ease of use and maneuverability in tight working quarters.

For additional ordering information, please refer to page 10.
