Ever since the first Lufkin® wood rule was produced in 1869, the Lufkin brand has been synonymous with high quality and unmatched accuracy. Today, Lufkin wood rules, power tapes, engineering and surveying tapes, specialty tapes and measuring wheels comprise one of the widest selections of measuring products available from any manufacturer.
Lufkin® Table of Contents

For over a century, Lufkin® tapes have been recognized as the standard for accuracy and high quality. Lufkin® steel tapes are manufactured to government standards traceable to the U.S. Department of Commerce, National Institute of Standards and Technology. Periodically, these standards are recalibrated with renewed certification by the N.I.S.T.

LUFKIN® TAPE CERTIFICATION AND ISO

Many end-users are registering for ISO certification. If they use measuring tapes as part of their production processes, it is advisable to establish procedures requiring the use of a certified tape as a master. Lufkin® provides selected certified tapes in excess of 50' for standard charges (which include the purchase price of the tape). Short tapes are not calibrated, but are checked for accuracy. Lufkin’s test procedures are traceable to the National Institute of Standards and Technology. Prices and available certified tapes are available from Apex Tool Group’s Technical Services Department.

Short tapes
Prefixes
C- Chrome Clad®
R- Replacement Blade
W or Y- Yellow Clad

Suffixes
ME- Metric/English Graduations, millimeter numbering
CM- Metric/centimeter numbering
CME- Metric/English graduations, centimeter numbering
D- English Graduated feet and decimal feet along one edge, feet and inches along other edge
X- Graduated in feet, inches and tenths of inches
DM- Graduated millimeters and feet, 10ths and 100ths
• Patented four rivet design reduces strain and extends blade life
• Hardened end hook is tough and durable
• End hook durability test results show that the Quad Hook® significantly outlasts the competition
• Burr on inside edge of Quad Hook® grabs onto the workpiece
• Quad Hook® serrations allow use as a scribe
• Quad Hook® on 1” tapes only

Quad Hook®

Short Tapes

• Blades are finished with an abrasive resistant coating for durability and long life
• Two color easy-to-read markings
• Self-adjusting end hooks
• Metric/English, English, Decimal, & Metric/Decimal
• Refills available on some models

PS3000 - Pro Series Power Return Tapes

• Patented end hook lasts 10 times longer than ordinary end hooks
• Ny-clad coating extends blade life
• Rubber cushion shell protects tape from impact and improves grip
• Compact size for comfort and easy storage
• Removable belt clip

Power Return Tapes

- Case designed to fit perfectly in the hand
- Lightweight, high strength chrome finished case
- Fits easily into most tape holsters
- Bright yellow blade has clear easy-to-read numerals
- Toggle lock is positioned for convenient operation and holds the blade securely in any position
- Virtually unbreakable Quad Hook, four rivets for extra strength (1" blade only)
- Cushioned blade return
- Removable belt clip
- All shelf pack power tapes on this page are carded

Quikread® Power Return Tapes

- Graduations printed in fractions and decimal equivalents to help you make quick readings
- Rounded blue case fits your hand for comfort
- Patented Lufkin Quad Hook® extends blade life by reducing blade breakage (1” only)
- Positive toggle lock holds blade securely at any length for accurate measurements
- Self-compensating end hook for inside and outside measurements
- Durable ABS case withstands rugged use on the job site
- Built in bumper reduces shock when blade is retracted, extending product life

## 800 Series Xtra-wide Power Return Tapes

- 1-3/16" x 25' power return tape, orange case, cushion grip
- New blade design achieves 10' stand-out, make longer measurements
- Soft touch lock button for better feel and control
- Rubber cushion absorbs impact and improves grip
- Case designed to fit your hand
- Clearcoat blade protection - more durable markings
- 4-rivet reinforced end hook - increased strength for long blade life
- Non-slip slide lock for positive blade locking
- Easy on/off belt clip for fast attachment to belt

### Executive® Diameter

- Designed for measuring diameters of pipe, cable, tire or any circular object
- Polished chrome case
- Zero falls in the same place on each side of the blade; conversion from diameter to circumference is made simply by turning the blade
- Model W606P shows diameter inches to 1/64ths; W606PD to 100ths, W606PM to millimeters
- Yellow clad blade
- Easy-to-read bold graduations on yellow background
- Spring action returns blade to case

How to Change Short Tape Blades:

1) Pull old blade out past end until about 2” of bluish metal spring is exposed. Put a nail in round hole (A) in spring to hold it.
2) Note how old blade is attached, then remove it.
3) New blade is reverse wound, ready to attach to spring. With blade graduations up, turn spring sideways and insert from bottom into slot (B) in new blade. Twist spring and pull back until notches (C) lock at rear of slot (B).
4) Remove nail and return blade to case.

A1 Yellow Clad

- 1/2” width only
- Black and red markings one side only
- Graduated feet and inches to 1/16ths top edge
- Graduated inches to 1/16ths bottom edge, first 12 inches to 1/32nds
- Instantaneous foot readings
- Stud marks every 16”

A2 Yellow Clad

- 3/4” width only
- Black and red markings one side only
- Graduated feet and inches to 1/16ths top edge
- Graduated inches to 1/16ths bottom edge, first 12” to 1/32nds
- Instantaneous foot readings
- Stud marks every 16”

A3 Yellow Clad

- 3/4” and 1” widths
- Graduated feet and inches to 1/16ths top and bottom edge
- Vertical numbering
- Fractional and decimal equivalent marking
- Stud marks every 16”

A4 Yellow Clad

- 3/4” and 1” widths
- Graduated feet, 1/10ths and 1/100ths top edge; feet, inches and 1/16ths on bottom edge
- Instantaneous foot readings
- NOTE: 1” width has red and black markings; 3/4” has black markings only
- Stud marks every 16”
A5 Yellow Clad

- 1-3/16” and 1” widths
- Black and red markings one side only
- Consecutive inches to 16ths
- Stud marks every 16”
- Truss marks every 19.2”
- Instantaneous foot readings

A6 Chrome Clad®

- 1/2” width only
- Chrome Clad® blade
- Black markings one side only
- Graduated to 1/10ths of inches on both edges

A7 Yellow Clad

- 1/2” width only
- Black markings one side only
- Graduated to 1/10ths of inches on both edges
- First 6” on bottom edge graduated to 1/50ths

A8 Chrome Clad®

- 1/2” width only
- Chrome Clad® blade
- Black markings one side only
- Graduated consecutive inches and 1/16ths on top and bottom edges

A9 Yellow Clad

- Available in 13mm, 19mm and 25mm widths
- Black and red markings one side only
- Both edges graduated to millimeters; numbered consecutive centimeters with larger red numbers at each decimeter

A11 Yellow Clad

- 1/2”/13mm width only
- Black and red markings one side only
- Top edge graduated and numbered inches
- Bottom edge to millimeters, numbered consecutive millimeters with red number at each decimeter

</table>
**A20 Yellow Clad**

- 6mm width only
- Markings both sides
- Consecutive centimeters to millimeters on side 1
- Diameter to millimeters side 2, numbered in centimeters

**A21 Yellow Clad**

- 1/4” width only
- Black markings both sides
- One side marked 1/4th scale (1 to 240), other side has 1/8th scale (1 - 480)

**A29 Yellow Clad**

- 3/4”/19mm and 1”/25mm widths
- Black and red markings one side only
- Graduated millimeters on top edge and feet
- 1/10ths and 1/100ths on bottom edge

**A30 Yellow Clad**

- 1”/25mm width only
- Markings one side only
- English top edge to 1/16ths, first 12” to 1/32nds, (continuous inches plus consecutive inch marks within each foot from 1’ mark). Truss marks every 19.2”
- Metric bottom edge graduated to millimeters, numbered consecutive centimeters

**A31 Yellow Clad**

- 1/2” width only
- Black and red markings on one side only
- Graduated to 1/16ths on top edge graduated in 1/32nds
- 1/10ths on bottom edge; first 6 inches graduated in 1/50ths

**A35 Yellow Clad**

- 1” width only
- Black and red markings one side only
- Graduated in feet, 1/10ths and 1/100ths of feet, numbered in feet and 10ths of feet
Lufkin® tapes and rules are manufactured to comply with U.S. Government Specifications Board’s requirements for accuracy. Our bench mark standards are certified by the N.I.S.T. Standard temperature for steel tapes is 68°F (20°C); coefficient of expansion for steel tapes is 0.00000645’ per degree Fahrenheit/0.0000116’ per degree Celsius. Standard tension for most long steel tapes, when fully supported throughout their entire length, is 10 lbs. Surveyor’s tapes of heavy gauge steel when fully supported throughout their entire length is 10 lbs. up to 100’, and 20 lbs. over 100’ long. All Lufkin® steel tapes have a clear abrasive resistant protection to provide wear and corrosion resistance.

### Long Tapes

**A36 Yellow Clad**

- 0.5” width only
- Black and red markings one side only
- Top edge numbered every 10 millimeters with red print for every 100cm increment and graduations every millimeter. Bottom edge numbered in consecutive inches graduated in 1/10ths of an inch with first 12” graduated to 1/50ths and numbered in 10ths.

**A37 Yellow Clad**

- 1” width only
- Black and red markings one side only
- Top edge graduated to 1/16ths, and numbered in consecutive inches and fractional equivalents to 1/8ths.
- Bottom edge with red print numbered at the mid-point of the measurement on the top edge.

### Hi-Viz® Universal Lightweight

• High impact Hi-Viz® orange polystyrene case
• Yellow clad blade .005”/0.13mm thick
• Easy wind nylon drum
• Easy-to-read black and red markings
• Hook ring is retained neatly in the contoured mouth of the case
• Removable belt clip
• All tapes are carded
• Metric-English tape measures have a 2-sided end hook for use with either scale

Artisan® Diameter and Tree Tapes

• Rugged, vinyl-covered steel case
• Chrome Clad® and Nubian® blade
• .008” thick blade
• Large easy winding drum and friction washers
• Nylon rollers guide the tape smoothly in and out of case
• “T” in the suffix denotes a tree tape which is fitted with a special claw hook designed for anchoring in tree bark
• “P” in number suffix denotes diameter

B1 Yellow Clad

• 3/8” width only
• Yellow clad blade
• Black and red markings one side only
• Graduated feet and inches to 1/8ths with instantaneous readings; 16” centers indicated by a diamond

B2 Chrome Clad®

• 3/8” width only
• Chrome Clad® blade
• Black markings one side only
• Graduated feet and inches to 1/16ths with instantaneous readings

B3 Chrome Clad and Nubian®

• 3/8” width only
• Chrome Clad® and Nubian® blade
• Black markings one side only
• Graduated consecutive inches to 1/16ths

B4 Chrome Clad®

• 3/8” width only
• Chrome Clad® blade
• Black markings one side only
• Graduated consecutive inches to 1/10ths
LONG STEEL BLADES

B5 Chrome Clad® and Yellow Clad

- 3/8" width only
- Chrome Clad® and yellow clad blade
- Black markings one side only
- Graduations feet to 1/10ths and 1/100ths

B7 Chrome Clad® and Nickel Clad

- 3/8" width only
- Chrome Clad®, nickel clad and yellow clad blade
- Black markings one side only
- Graduated feet and inches to 1/8ths with instantaneous readings; 16" centers indicated by diamond

B8 Yellow Clad

- 3/8" width only
- Yellow clad blade
- Black and red markings both sides
- Bottom side graduated millimeters, numbered in centimeters and meters
- Top side graduated feet and inches to 1/8ths with instantaneous readings; 16" centers indicated by a diamond

B9 Yellow Clad

- 3/8"/10mm width only
- Yellow clad blade
- Black and red markings both sides
- One side graduated feet and inches to 1/8ths with instantaneous readings; other side graduated in consecutive millimeters with instantaneous meter numbers at every 100mm

B10 Nubian® and Chrome Clad®

- 3/8" width only
- Nubian® and Chrome Clad® blade
- Markings both sides
- One side graduated 1/10ths and 1/100ths of feet; other side diameter feet and 1/10ths of inches
B11 Nubian®

- 3/8” width only
- Nubian® blade
- Markings both sides
- Graduated feet, inches and 1/8ths one side; other side graduated diameter feet and inches with an extra diameter inch subdivided to 64ths left hand

B12 Nubian®

- 3/8” width only
- Nubian® blade
- Markings both sides
- Graduated consecutive inches to 1/16ths one side; other side to diameter inches, with an extra diameter inch subdivided to 64ths left hand

B14 Yellow Clad and Chrome Clad®

- 3/8” width
- Yellow clad and Chrome Clad® blade
- Black and red markings both sides
- Front side graduated in feet and inches to 1/8ths; back side in meters and millimeters numbered in centimeters

B15 Chrome Clad®

- 10mm width
- Yellow clad and Chrome Clad® blade
- Marked both sides
- One side meters, decimeters and millimeters; other side reads diameter from circumference to 2m of diameter in millimeters
General Information

- Designed for rugged field use by the surveyor, engineer or contractor
- More accurate than tolerances established by the National Bureau of Standards when fully supported with standard tension of 4.5lbs.
- Tape stretches 0.0011” foot per additional pound of tension over 4.5lbs.
- Durable, waterproof and able to withstand breakage and abrasion under extreme conditions
- Non-conductive construction material allows safe use around electrical hazards

Pro Series Fiberglass Tapes

- 60 strand fiberglass encased in two layers of PVC for extra durability
- Two color, two sided blade includes fractional and decimal graduations
- 3:1 rewind
- Dual material grip on handle and side of cross bars, for added comfort
- Rotating mouthpiece, reduces strain on the blade, and maintains blade alignment as it extends and retracts
- Includes 3 interchangeable end attachments, snap fit lock mechanism, for quick changes in the field
  - Standard folding, two position end hook for inside and outside readings
  - appraiser’s hook, grips on large items such as downspouts and concrete (for estimation)
  - ring attachment, fits on stake (included) for one person measurements
- Integrated storage in handle, with sliding latch closure, to hold all 3 end attachments

### C5 White Clad

- White clad blade
- 5/8" width
- Black and red markings one side only
- Graduated feet and inches to 1/8ths, red feet numbers and black inch numbers

### C6 White Clad

- White clad blade
- 5/8" width
- Black and red markings one side only
- Graduated feet to 1/10ths and 1/100ths, red feet numbers and black tenths of feet numbers
Oil Gauging

- Chrome Clad® for dark (heavy oils)
- Nubian® for light (clear oils)
- "Double Duty" oil gauging tapes with both Chrome Clad® and Nubian® (black) for dark (heavy) and light (clear) oils
- Made of heavy gauge 1/2” (13mm) x .012” (0.3mm) steel
- Snap-swivel hook on front end of tape for a plumb bob
- Two arm frames for shorter lengths; four arm frames for 30m/100’ and greater
- Large drums and winding handles for quick and easy rewinding
- Handle folds over for storage and to lock line at extended position

Plumb bobs are not supplied with tapes. The last part of the catalog number denotes the style of the bob the tape is made to accept. Lufkin oil gauging tapes and plumb bobs are manufactured to meet the applicable specifications outlined in the National Institute of Standards and Technology Handbook 44, 2011 Edition, Section 5.52. Manufacturing tolerances for final measurement comply with API MPMS Second Edition, August 2005, Chapter 3, Section 1A, Appendix 1.2.

1. Never gauge a tank during an electrical storm.
2. Ground yourself and your tools by touching the tank ladder before climbing the ladder. Do not wear gloves when grounding yourself. Gloves prevent proper grounding.
3. Ground yourself before opening the gauging hatch by touching the handrail or platform (without gloves on). During and after removal of the gauging cover, stand so that the gas will not be inhaled. Wear a gas mask if toxic gases are present.
4. Always maintain contact between the gauging tape and the edge of the hatch from the moment the gauge bob enters the hatch until the gauge bob is removed from the hatch.

---

### Atlas® Chrome Clad® / Nubian® Double Duty

- Black markings bonded to steel and recessed beneath multiple layers of nickel and chrome electroplating provides greater resistance to wear and corrosion
- All tapes read right to left
- Heavy-duty frame designed for years of rugged use
- All frames include a grounding strap
- Plumb bob must be ordered separately
**Atlas® Chrome Clad®**

- Nubian® blade
- Graduated in meters; numbered in millimeters

Oil Gauging

It takes more than a quality gauging tape, it takes a smart user. Every time you use a Lufkin oil gauging tape, follow proper grounding techniques. Ground your body. Ground your gear. And always use a grounding strap. Lufkin oil gauging tapes come complete with a grounding strap and an ESD handle, and are in full compliance with all current and proposed American Petroleum Institute standards. Achieve a solid ground every time. Use Lufkin oil gauging tapes, and follow proper grounding procedures.

How to Measure an Inage Plumb Bob

Tapes cut and fitted with the swivel snap to be used with the 588 and 590 plumb-bobs are known as inage gauging tapes. When the plumb bobs are assembled to the swivel snap the zero point is at the bottom of the plumb bob. When being used, the plumb bob and tape are lowered until the bob contacts the bottom of the tank. When the tape is reeled in, the liquid line is read on the tape line itself, thereby showing you the contents of the tank.
Inage Oil Gauging Plumb Bobs

- For use in heavy oils
- 20-ounce, except for 588 (6oz.)
- Cylindrical shaped
- Tapered point tip
- Solid brass or stainless steel bob

How To Measure With an Outage Plumb Bob

Tapes which have the swivel snap fitted so as to accommodate the 5871/2 plumb bob are known as outage tapes. When the 5871/2 plumb bob is assembled to the tape line the zero point is at the intersection of the swivel snap and the plumb bob. When using outage gauging tapes the tape is lowered into the tank until the plumb bob just penetrates the liquid. The tape is then rewound and the liquid level is read right off the plumb bob. The reading on the plumb bob is added to the tape reading giving the total outage (how much liquid has been removed from the tank).

Outage Oil Gauging Plumb Bob

- 20oz., square shaped solid brass bob
- Eye milled from solid brass block (not removable)
- 7/8”/22mm square, 6”/152mm overall length
- Graduated in inches to 1/16ths, or metric top to bottom, zero falls inside top of hook eye

Steel Tape Line Accuracy

Lufkin® steel tapes are made to government standards. Our bench standards for the United States are certified accurate by the United States Department of Commerce, N.I.S.T. Tapes for Canada are made to Canadian government standards.

Temperature standard for steel tapes is 68°F, which equals 20°C. Coefficient of expansion of steel tapes is 0.00000645' per degree F; 0.0000116' per degree C. This amounts to 0.000645' or 0.00774' per degree F. on a 100' tape, and one-half as much on a 50' tape. As a figure that is reasonably accurate and also easy to handle, it is customary on very long runs of pipe to allow 1/10" per 100' for each 10° change.

The above illustration shows, for a 100' tape, the actual length variations of temperature within the range of 20° below to 120° above zero °F. The terminal graduation on the lower edge is at 68°, this being standard temperature. Standard tension for steel tapes 25 to 100' long (10 to 30m) supported entire length on a horizontal, flat surface, is 10 pounds (4.5 kg.); for all tapes over 100', 20lbs., (9kg.). For steel tapes suspended horizontally and supported only at ends, there can be no set or standard tension for accuracy because of weight and other variations.

The following listings are averages of many tests made by the N.I.S.T. of Lufkin® steel tapes supported throughout and supported ends only. These averages are taken from the experience of tests and should be used as a working basis only, and not to replace the test of any individual tape. All tape lengths are 100'.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

NOTE: Temperature and tension need to be taken into account only on precise work. We recommend a government test of tapes to be used for such work or for use as master standard. The N.I.S.T. and Lufkin® have a charge for this test.

Derrick

- Chrome Clad® blade
- Nominal blade thickness .019”
- Extra large winding drum provides rapid line recovery and permits tape line to be easily detached from reel
- Special hook ring with ribbed face at zero
- Leather thong is provided to use through eye at rear when tape is removed from reel
Pro Series Ny-Clad® Steel Tapes

- Durable nylon coating on blade resists wear under extreme conditions
- Super fast 3-to-1 blade retraction saves time in the field
- Hi-Viz® orange case is easy to find on the job site
- Steel blade will not stretch under normal use

E1 Chrome-Clad® and Yellow Clad

- 1/4” and 3/8” widths
- Chrome Clad® and yellow clad blade
- Markings on one side only
- Graduated to feet, 1/10ths and 1/100ths with a blank space at last end

E2 Chrome Clad®

- 1/4”/6mm width only
- Chrome Clad® blade
- Markings on both sides
- Graduated millimeters one side
- Graduated feet, inches and 1/8ths other side

E3 Chrome Clad® and Yellow Clad

- 1/4” and 3/8” widths
- Chrome Clad® blade
- Yellow clad available in 1/4” only
- Black markings one side only
- Graduated feet and inches to 1/8ths with instantaneous readings
- 16” centers indicated by a diamond symbol on 3/8” width only

E4 Ny-Clad® Yellow

- 1/2” width only
- Nylon-clad yellow blade
- Black and red markings one side only
- Graduated feet and inches to 1/8ths with instantaneous readings
- Numbered with feet and instantaneous foot markings in red and inches in black

E5 Ny-Clad® Yellow

- 1/2” width only
- Nylon-clad yellow blade
- Black and red markings one side only
- Graduated feet to 1/10ths and 1/100ths
- Numbered with feet in red and 1/10ths in black

E11 Chrome Clad®

- 6mm width
- Black and red markings one side only
- Graduated meters to millimeters
- Red meter numbers and black millimeter numbers at each decimeter

SURVEYING TAPE BLADES
**E12 Chrome Clad®**

- 1/4" width
- Black and red markings one side; black markings other side
- Graduated meters to millimeters one side
- Red meter numbers and black millimeter numbers at each decimeter
- Graduated feet to 1/10ths and 1/100ths other side
- Numbered feet and 1/10ths black markings only

**E13 Chrome Clad®**

- 1/4" width
- Black and red markings both sides
- Graduated meters to millimeters one side
- Red meter numbers and black millimeter numbers at each decimeter
- Graduated feet and inches to 1/8ths other side with red feet numbers and black inch numbers

---

**Engineering and Surveying Tapes**

- Ideal for engineers and surveyors to precisely measure route surveys, highways and railways, mining and survey work
- Heavy gauge thick steel tape
- Raised markings against a hard chrome or black background
- Protected by abrasion resistant coating to provide long life under adverse conditions
- Heavy gauge clip ends on each tape and refill attach to reel or tensioning device
- Tapes include two leather thongs and a correction scale (Celsius for Metric tapes, Fahrenheit for English tapes)
- Different reel choices available for each style of tape
- Reel descriptions on pages 97 - 98
- Please order reels separately

---

**Super Hi-Way® Nubian®**

- Nominal thickness .017"
- Easy-to-read raised graduations
- Railroad half-gauge mark 2’, 4 1/2” from zero except on metric tapes
- 09100B, 09200B and 09300B: Lines have a blank space at each end. Extra foot before zero is graduated right to left to 1/10ths and 1/100ths. Balance is marked every foot except last foot of each 100’ length, which is in 100ths of feet

**Red End® Series Folding Wood Rules**

- First choice of carpenters and other professional craftsmen
- Bold red and black markings contrast sharply against white or yellow finish background
- Clear, abrasive-resistant coating protects markings
- Long wearing, riveted lock joints eliminate end play and retain accuracy
- Brass plated end clasps prevent wear

**Red End® Extension Folding Wood Rule**

- 6' and 8' wood rules available
- Graduated slide rule extends up to 6"
- Slide rule runs under friction in T-slot and stops at each end to prevents slide from falling out
- X46X has two 6" extension slides; an extension is ready for use on the first section
- HX46 has hook; zero falls at inside of hook, for distance measuring
- Marked both sides and both edges
- X46F has flat, inside markings; numbering begins on inside of rule
- Graduated to 1/16ths of an inch, 16" stud centers in red, regular outside markings

**Red End® Folding Wood Rule**

- Marked both sides, both edges
- Graduated to 1/16ths both edges; 16” stud centers marked in red
- Regular outside markings
- 066F has inside markings; numbering begins on inside of rule; measurement lies close to the work
- 062CME is marked both sides, reading left to right on both sides; rule is graduated in millimeters with centimeter and meter markings on metric side; English side is marked to 1/16ths

</table>
**Red End® Plumber’s Folding Wood Rule**

- Used for working with 45° elbows to eliminate figuring and chance of error
- Graduated one side, in black, inches to 1/16ths both edges
- Other side in red, 45° scale inches to 1/16ths upper edge only
- Turning rule from black to red gives the corresponding 45° elbow measurement
- Example: Sketch at right shows 10” 45° offset; by turning rule at 10” graduation on standard inch side red graduation directly opposite indicates center-to-center fittings to be 14 1/8” Actual pipe length varies as allowances must be made for type of pipe and fitting used. All other size offsets are calculated in same manner. Where offset is longer than length of rule, add 45° scale measurement of extra distance to last scale on rule (101-13/16).

**Red End® Brick Mason’s Folding Wood Rule**

- Used by bricklayers
- Graduated vertical inches to 1/16ths, both edges
- Brick Mason’s scale on inside, red course counters numbered consecutively
- Regular outside markings in black
- Using the Lufkin® “Red End” 636 Brick Mason’s Rule is easy and fast. For instructions on the 656, see below.
- To take a measurement when mortar thickness is known: As an example, assume mortar thickness is 1/2” and the average thickness of brick is 2 1/4”. Added they would give a 2 3/4” course. Simply place your thumbnail on the edge of the rule at 2 3/4”, turn over to the other side, and your thumbnail will be on the scale 6 mark. This is the correct scale to use under the above conditions. The illustration at left shows how easy it is to check the wall as it is being laid. Correct readings from the top edge of bricks are at scale 6. This rule speeds up correct scaling when an open space is to be bricked. There is but one simple operation when only space is known. Just measure the space with the scale side of the rule to the closest scale mark. This will give you the correct scale to use. For instance, assume that a space 37” is to be bricked. Using the Brick Mason’s scale side of the rule to measure, the 37” figure falls between scale 4 and scale 8. Checking both these scales, by the previously described thumbnail method, at the starting end of the rule, it is found that scale 4 is equal to 2 5/8” and scale 8 is equal to 2 7/8”. If the brick to be used averages 2 1/2”, scale 4 would allow 1/8” joint and scale 8 a 3/8” joint. The more satisfactory of these two size joint thicknesses can be selected for the job. The brick industry is using more and more oversize brick (also referred to as “queen” or “king size” brick). The estimates are about 40% of the brick sold is oversize. These bricks have a height of 2 3/4” vs. 2 1/4” for the standard or modular brick. Due to the number of requests from brick masons, we now offer the new #656 brick mason wood rule. The #656 rule has brick spacings at 2 7/8ths and go to 3 1/2” in 1/16” increments. The brick spacings will be identified by black letters A through K. Letters are used to prevent confusion with spacings shown on #636. The #656 rule is painted yellow compared to white for the #636.

Red End® Modular Spacing Folding Wood Rule

Designed for masonry work

- All sections have square ends
- Every joint opens on even number
- Inside marked with 6 scales in a 16” module. The scales are as follows: 2 courses in 16” space (for concrete blocks and glass blocks); 3 courses in 16” space (for facing tile); 4 courses in 16” space (for small facing tile and economy brick); 5 courses in 16” space (for engineered brick); 6 courses in 16” space (for Roman brick). Scales include mortar space and spacing for 6” and 12” blocks.
- Outside is graduated on both edges to 1/16ths
- The first end section is a short section which permits butting the rule on the first 16” module

Measuring Wheels

All Wheels
- Measure as fast as you can walk
- For estimated measurements
- Measures curved, horizontal, and vertical surfaces - flexible for multiple uses
- Tough plastic parts and molded rubber tires resist corrosion
- Telescoping handles - adjustable height comfortable for most users

MW18
- Compact measuring wheel, convenient for quick estimates
- Ideal for real estate or homeowners
- Fits into standard size briefcase; telescoping handle reduces length to 17” for easy storage
- Dial indicator measures up to 999” 11” without resetting
- MW18M, meters and decimeters

MW38
- Large wheel model ideal for uneven terrain
- Also suitable for long indoor measurements such as manufacturing plant layout or outdoor measurements on firm and smooth surfaces
- Dial indicator measures up to 9,999’ 11” without resetting (almost 2 miles)
- Retractable handle adjusts for comfortable measurements
- MW38M, meters and decimeters
